Summary

Backend-focused developer designing resilient APIs, scalable systems, and delivery-ready products with clean architecture and strong execution discipline.

Experience

Software Developer (Backend) | Wholewave Elements Pvt Ltd | Chennai | June 2025

- Present
- Building backend systems with a focus on scalable APIs, maintainable architecture, and dependable delivery.
- Working across payment integrations, operational workflows, and data handling with performance and reliability in mind.
- Collaborating closely with product and engineering teams to ship stable features that support real business use.

Independent Project Developer | Freelance and Self-Directed Work | Remote | 2023

- 2025
- Designed and shipped portfolio-grade product builds across MERN, Laravel, and IoT use cases.
- Handled end-to-end implementation choices including authentication, data models, and frontend integration.
- Strengthened production habits through self-directed product delivery and debugging work.
