SKILLS

Languages:	JavaScript, Python, PHP, SQL, NoSQL, HTML5, CSS3
Frameworks:	Laravel, React.js, Node.js, Express.js, Bootstrap, Tailwind CSS
Libraries/Tools:	Git, GitHub, Bitbucket, Docker, Postman, CI/CD, Composer, phpMyAdmin
Databases:	MySQL, MongoDB
Development Practices:	Agile, MVC Architecture, Unit Testing

ABOUT

Detail-oriented Software Engineer experienced in building scalable applications using Laravel and PHP, with strong backend, RESTful API, and database optimization skills. Proficient in Agile methodologies, version control, and collaborative development workflows. Passionate about learning new technologies to deliver reliable and impactful solutions.

EXPERIENCE

Wholewave Elements Pvt Ltd <i>Software Developer (Backend)</i>	Chennai, India 06/2025 – Present
- Develop and maintain RESTful APIs using Laravel to enable efficient data exchange between frontend and backend systems, optimizing MySQL queries and implementing caching strategies to reduce page load times by 30% - Design and deploy full-stack solutions following MVC architecture on AWS with S3, and streamline CI/CD pipelines using Git and Bitbucket within an Agile environment to ensure reliable, timely delivery. - Implement secure authentication and authorization using JWT, along with data validation and security best practices to support stable, production-ready web applications.	

CERTIFICATIONS

Enhancing Soft Skills and Personality	NPTEL (Apr, 2023)
Entrepreneurship and IP Strategy	NPTEL (Sep, 2023)

EDUCATION

R.V. College Of Engineering. Masters of Computer Applications CGPA: 7.91/10	Bengaluru, Karnataka, India 11/2022 - 12/2024
Vidyalankar School of Information Technology. Bachelor of Science (Information Technology) CGPA: 8.72/10	Mumbai, Maharashtra, India 06/2019 - 04/2022

PROJECTS

WEGOFIN

- Designed and implemented a custom payment integration system enabling seamless online transactions with secure handling of payments, refunds, and settlements using real-time tracking.
- Integrated robust RESTful APIs to support multiple payment methods, improve system reliability, and ensure scalability.
- Focused on performance optimization, data security, and collaboration with cross-functional teams to deliver compliant, secure, and high-performing financial solutions.

MERN Stack Real Estate Platform

- Developed a MERN stack real estate application featuring email/password and Google OAuth authentication, property listings, image uploads, profile management, and advanced search functionality using Redux Toolkit.
- Built a secure backend with encrypted authentication and implemented responsive, dynamic frontend components for listings and file uploads using Tailwind CSS.

Smart RFID Enabled Livestock Management System

- Designed and engineered a proof of concept to aid farmers in effectively monitoring the weight, health, and vaccine parameters of a large-scale flock.
- Integrated the use of ESP8266, RFID tags, H-bridge components, MQTT protocol, and PostgreSQL database to develop and implement the solution.

HOBBIES

Video Games, Travelling, Movies and TV Shows
